Design Inspiration

The **Yohan Sport jersey** design draws **cultural and historical** inspiration from a prominent equestrian statue located in Sulaymaniyah. This powerful sculpture, which depicts a mounted figure in traditional Kurdish attire, symbolizes **strength, leadership, and resilience**—values that align with both athletic performance and regional pride.

Subtly embedded as a background pattern on the jersey, the statue's form becomes a modern tribute to local heritage, turning every athlete who wears it into a living representation of Sulaymaniyah's spirit. The fusion of tradition and contemporary sportswear design not only elevates the uniform's aesthetic but also honors the city's cultural identity on and off the field.
